SUMMARY

Full Stack Software Engineer experienced in designing, developing, and maintaining end-to-end web applications. Strong in collaborating with cross-functional teams, delivering features in agile environments, and ensuring code quality, performance, and security throughout the development lifecycle.

SKILLS

Frontend: React, Angular, TypeScript, JavaScript, Redux, webpack, Material UI, HTML, Ajax, Cypress, Playwright

Backend: Java, Spring Boot, Hibernate, REST APIs, GraphQL, Node.js, Express.js

Cloud & DevOps: AWS, Docker, Terraform, CI/CD, Kubernetes, Jenkins, Agile, Scrum, SDLC

AI/ML: Machine Learning, Deep Learning, TensorFlow, PyTorch, OpenAI APIs, GitHub Copilot

Databases: MySQL, PostgreSQL, MongoDB, Cassandra

Tools: Git, Postman, Kafka, Jira, Confluence, Power BI, Tableau, R Studio, Python (Seaborn, Matplotlib), MS Office

WORK EXPERIENCE

Deloitte, Technology Analyst (July 2021 – July 2023)

- Modernized a legacy claims platform using React, designing reusable UI components and integrating RESTful APIs to reduce processing time by ~4 hours daily and significantly enhance user experience.
- Developed and optimized backend services with Spring Boot, creating robust APIs and business logic. Improved platform performance by optimizing query logic and reducing API response times, while ensuring efficient data contracts with frontend teams.
- Ensured high code quality and secure deployments through comprehensive JUnit (Spring Boot backend) and Cypress/Jest (React frontend) testing, achieving over 85% test coverage, and actively contributing to CI/CD pipelines via Jenkins and Docker.
- Contributed to Agile sprints, including planning, backlog grooming, and client demos, ensuring iterative value delivery every two weeks.
- Managed AWS infrastructure (Lambda, S3, EC2) for 250+ applications, utilizing ServiceNow and Datadog to improve efficiency and reduce downtime for critical cloud operations.

EDUCATION

University of South Florida, Tampa. — MS, Computer Systems Analysis (Aug 2023 – May 2025), GPA: 3.94/4

PROJECTS

- Built a full-stack recipe management app with React, Tailwind CSS, Spring Boot, and MySQL; implemented JWT auth, BCrypt password hashing, and role-based access for secure recipe editing and deletion.
- Developed a static web app to help USF students compare apartment options; included price dashboard, map integration, CRUD features, and hosted it on Azure and USF MyWeb. [Link to website](#)
- Developed backend components of a transaction processing system as part of the JPMorgan Chase Software Engineering Virtual Experience on Forage. Implemented Kafka consumers for real-time message processing, applied transactional validation, persisted data using JPA with H2, and integrated an external API. Built RESTful services for balance queries. Tools: Java, Spring Boot, Apache Kafka, JPA, H2, REST API. [Source code](#)
- Designed an interactive Tableau dashboard to visualize Tampa Bay unemployment trends (1990–2023); preprocessed data in Python, created multi-county comparisons, and hosted it on Tableau Public. [Dashboard](#)

ACCOMPLISHMENTS

- Achieved Spot reward by completing project deliverables with accuracy and efficiency using react and achieved one more Spot reward for effectively helping in AWS cloud Infrastructure and contributing towards firm initiative at Deloitte USI.
